Summary:

Talked about meeting times that work best for all members. Settled on Mondays at the EPL from 4:15 - 4:30 PM. Discussed ideas for projects. Two projects were talked about the most; one being glasses that can magnify and the other being a project that Chris worked on from 211. It involves a glove that can translate ASL to text and then to speech. For the next meeting group members will come up with ideas for more projects as one hasn't yet been settled on.
